

We have begun the topographic survey and easement preparation for the sidewalks on the priority list. I have a question on two of the sidewalks on the priority list:

51806 Schoenherr, Parcel 23-07-13-300-036: This parcel is vacant, however it is zoned LM (Light Manufacturing). It is on the priority list, however has potential for development. Should we leave in on the list, or remove it? (The parcel to the north is also vacant, also zoned LM, and it is not on the list) My opinion: Eliminate this parcel.

51400 Schoenherr, Parcel 23-07-13-300-018: This parcel is developed, zoned LM, however was not constructed with sidewalk. (The building(s) were constructed in 1980). My opinion: Keep on the list.
